JMA Solutions provides a turn-key solution that fully integrates a Knowledge Management process with SharePoint system design, development, customization and deployment. Our services also include iterative testing, training and documentation support to maximize participation and improve the overall user experience.

Our team's approach is based on the Agile Development Model. We continuously communicate with developers and stakeholders to propel the application from requirements through deployment.

SharePoint Services include:

- Custom SharePoint Site Development
- Dashboard Development
- Data Analytics Integration
- SharePoint Security Policy Implementation
- Content Management
- Custom Workflow Development
- Search and Metadata Optimization
- Template Development
- Document Management Process Development
- Integration with Third-Party Applications
- Help Desk Support
